## CAREER OBJECTIVE

I am an aspiring software developer based in Johannesburg SA. I consider myself to be an internet enthusiast with a strong fascination for web technology. I keep up with the exciting development and innovations of web application. It is my dream to, one day take part in driving and pioneering the future of the internet.

## WORK EXPERIENCE

### Frontend Development Upwork GIG

📅 Apr 26, 2022 - May 7, 2022

- Make a div follow the scroll

### Projects

#### React JS documentation page clone Web application 🔗

- In this project I implemented responsive design to accommodate a variety of screen sizes such as mobile, tablets and desktop screen sizes.
- Moreover, I have combined the use of CSS and SCSS to style the website in a more productive approach using SCSS
- I have also adapted my HTML mockup to the originals website with other techniques that include iframes, scrolling and accessibility features to ensure it looks as was design on the original website

## EDUCATION

### Matric

[J.E Malepe Secondary School](#)

📅 2012-2016

📍 Gauteng, JHB
